V1.0

ICHITA Visual Identity Guidelines

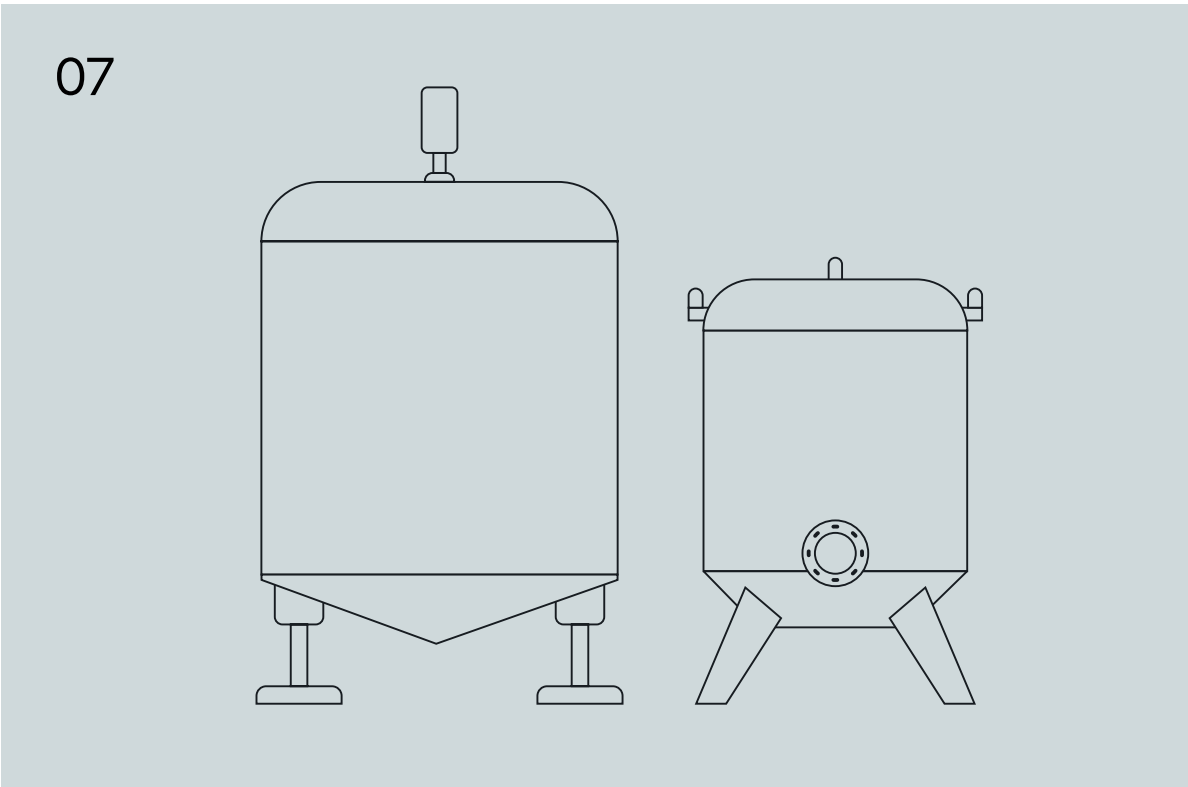

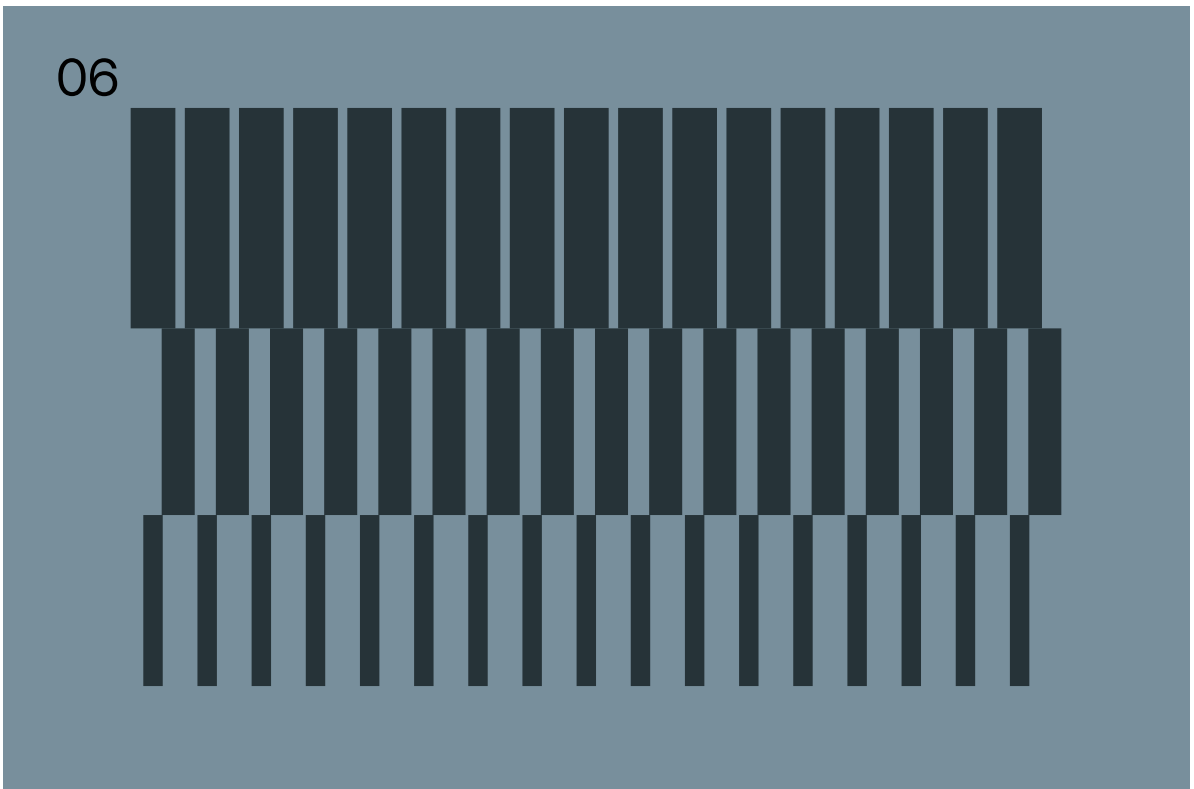

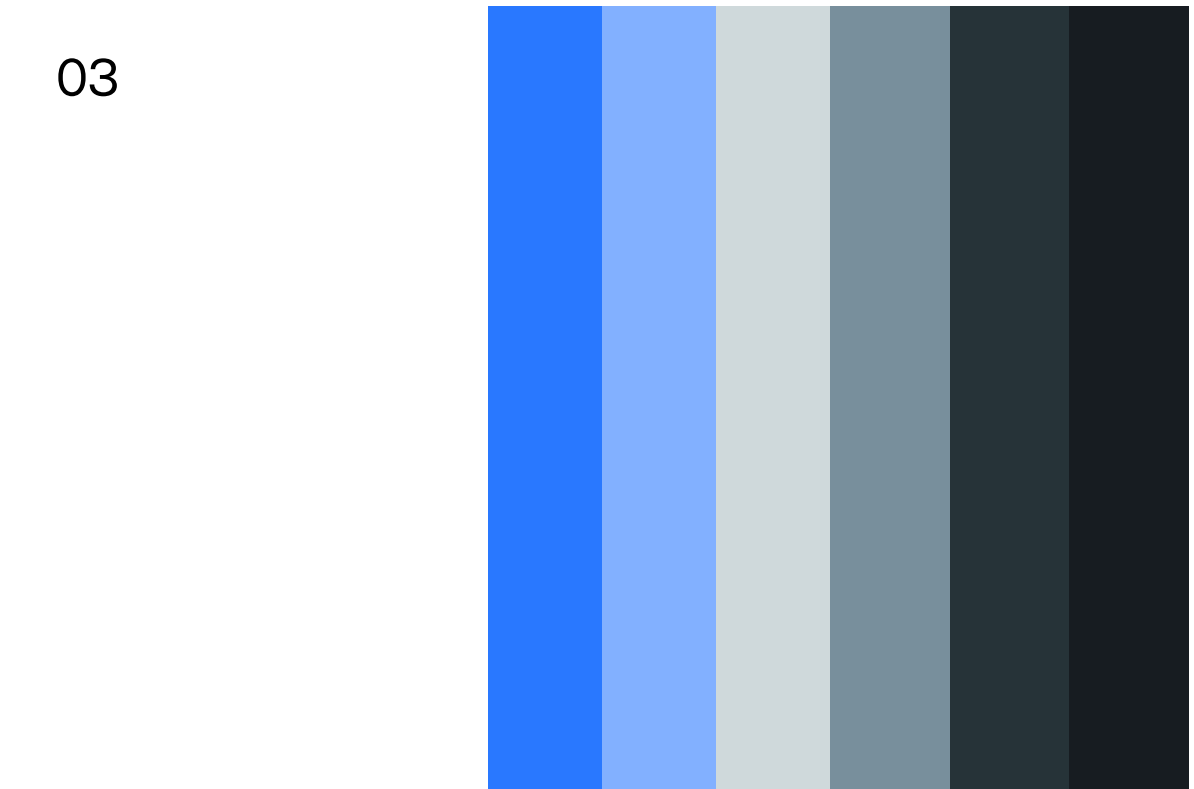

Introduction

Welcome to the Ichita visual identity guidelines. This document provides guidance on how best to use our visual identity. It details our core identity assets of logo, colour, typography, graphic devices, illustration and the ways in which these assets can be combined to create a cohesive but flexible brand system.

- 09 Photography (Operational)

1.0 Logo

One of the most important brand assets in our visual identity is the Ichita logo which is made up of a word mark and symbol. They serve as our main identifier and clear markers of who we are while communicating our core values.

1.0 Logo

1.1 Overview

The custom Ichita Wordmark is our main identifier and will appear as a sign-off or endorsement on all of our communication to reinforce the authority of our brand.

The Ichita Symbol is made up of arrow devices taken from the angle of the 'A' in our Wordmark and built around the concept of 'Process' & 'Innovation'. They act as a representation of the Ichita brand in its most reduced and simplified form. The symbol can be used as an endorsing mark or as a sign-off but should only be used when the Ichita context is already evident.

Wordmark

Symbol

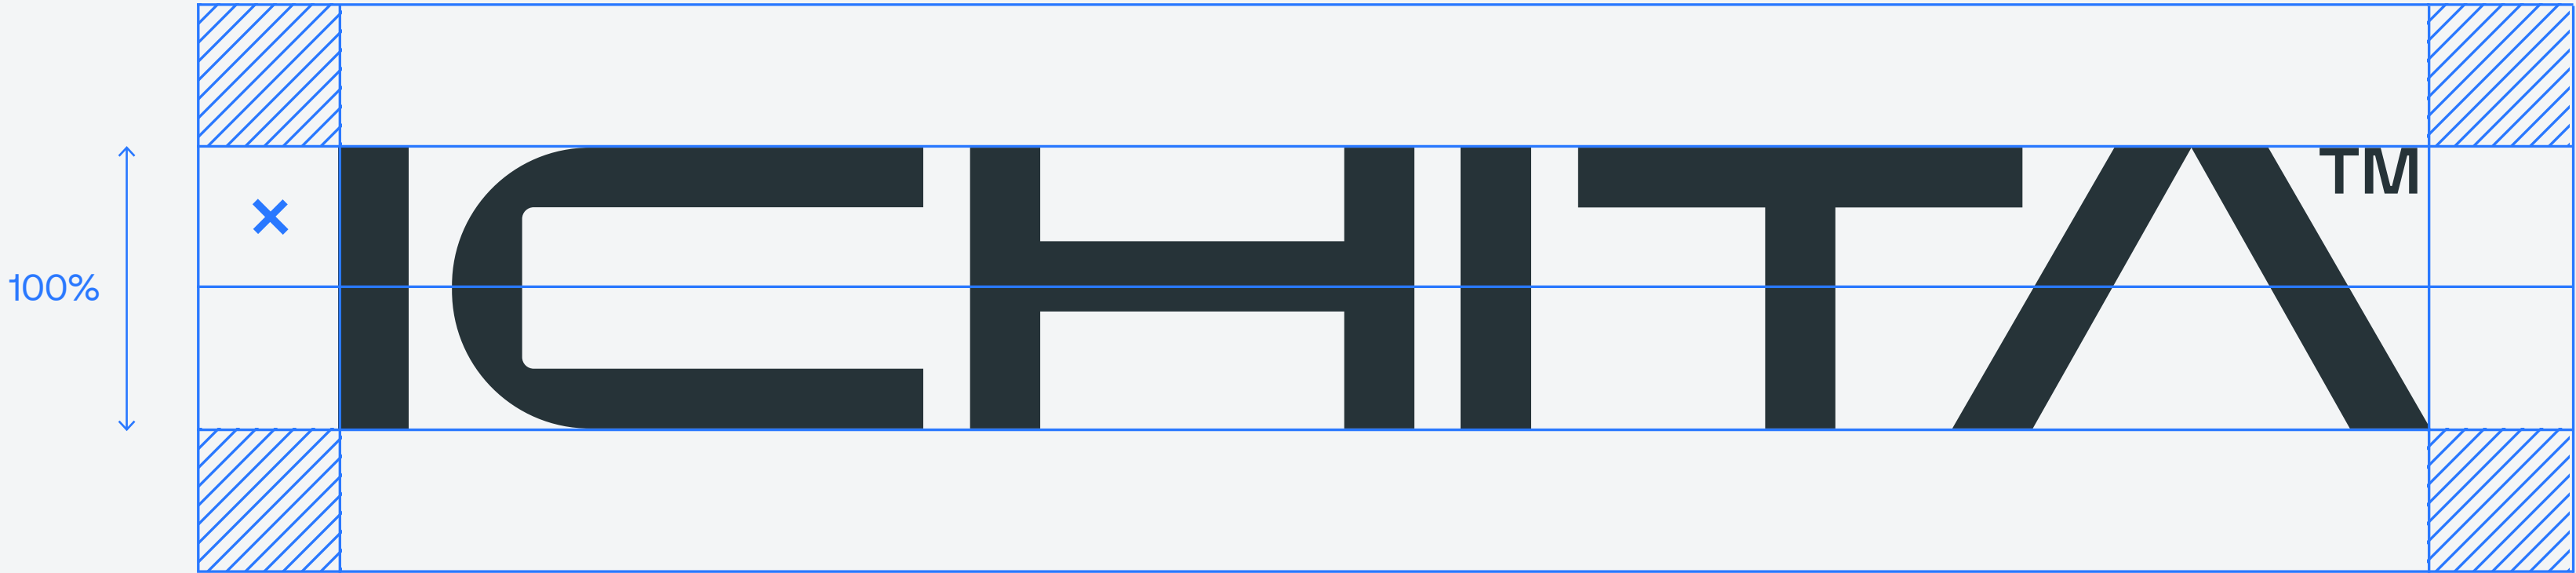

1.0 Logo
1.2 Wordmark

This is your primary logo. To maintain it’s integrity it should always appear in this fixed format and never be altered, redrawn or modified in any way.

1.0 Logo
1.3 Clearspace

The ‘clear zone’ is the area that surrounds the logos. To ensure the logos remain clear and impactful, nothing should ever appear inside this area. It equals to 50% of the height of the word mark.

1.4 Symbol

This is our symbol. To maintain it’s integrity it should always appear in this fixed format and never be altered, redrawn or modified in any way.

1.0 Logo
1.5 Clearspace

The ‘clear zone’ is the area that surrounds the logos. To ensure the logos remain clear and impactful, nothing should ever appear inside this area. It equals to 50% of the height of one arrow device.

1.0 Logo

1.6 Colourways

This page illustrates colour application of the logo across different backgrounds. The logo should only ever be used in these colourways.

The Ichita logo uses Blue Grey 03 across most colours. When the logo is placed over a darker background colour use White.

The same rules apply to the Symbol.

2.0 Colour

Colour is a vital component of our visual identity that drives brand attribution and awareness. Our colour palette is unified by a strong blue supported by a series of neutral colours.

White

2.0 Colour

2.1 Overview

One of the brand's most valuable assets is the Ichita palette. Tone variations suitable for a variety of purposes can be produced by combining various colour schemes.

The vibrant Ichita Blue accent is one of our most recognizable colours. For the most part, the brand's backdrop is made up of the White and harmonious range of lighter neutrals. When combined with the darker colours, which are used more sparingly, this palette creates a dynamic and recognizable mix.

3.0 Typography

Our typeface provides a distinct voice for the Ichita brand. The application of typography can scale from impactful through to functional depending on the content and communication requirement.

3.0 Typography

3.1 Overview

Our primary font, Aeonik, is used across all communications. The typeface has a timeless and modern aesthetic and is a structural workhorse that was meticulously engineered. Flexibility is guaranteed with a range of weights. Ligatures, fractions, case-sensitive punctuation, symbols, forms, and arrows are among the features of Aeonik.

Cc

3.0 Typography

3.3 Numbers

The display typeface Betatron, which represents a futuristic ideology, is used for our numerals. The distinctly mechanical and industrial aesthetic supports the notion that our engineering and technology company places innovation at the heart of its operations.

4.0 Pattern

Our brand pattern options may be used to add versatility and interest. The designs draw inspiration from our process. These patterns may be used at a variety of scale, and color within our brand palette.

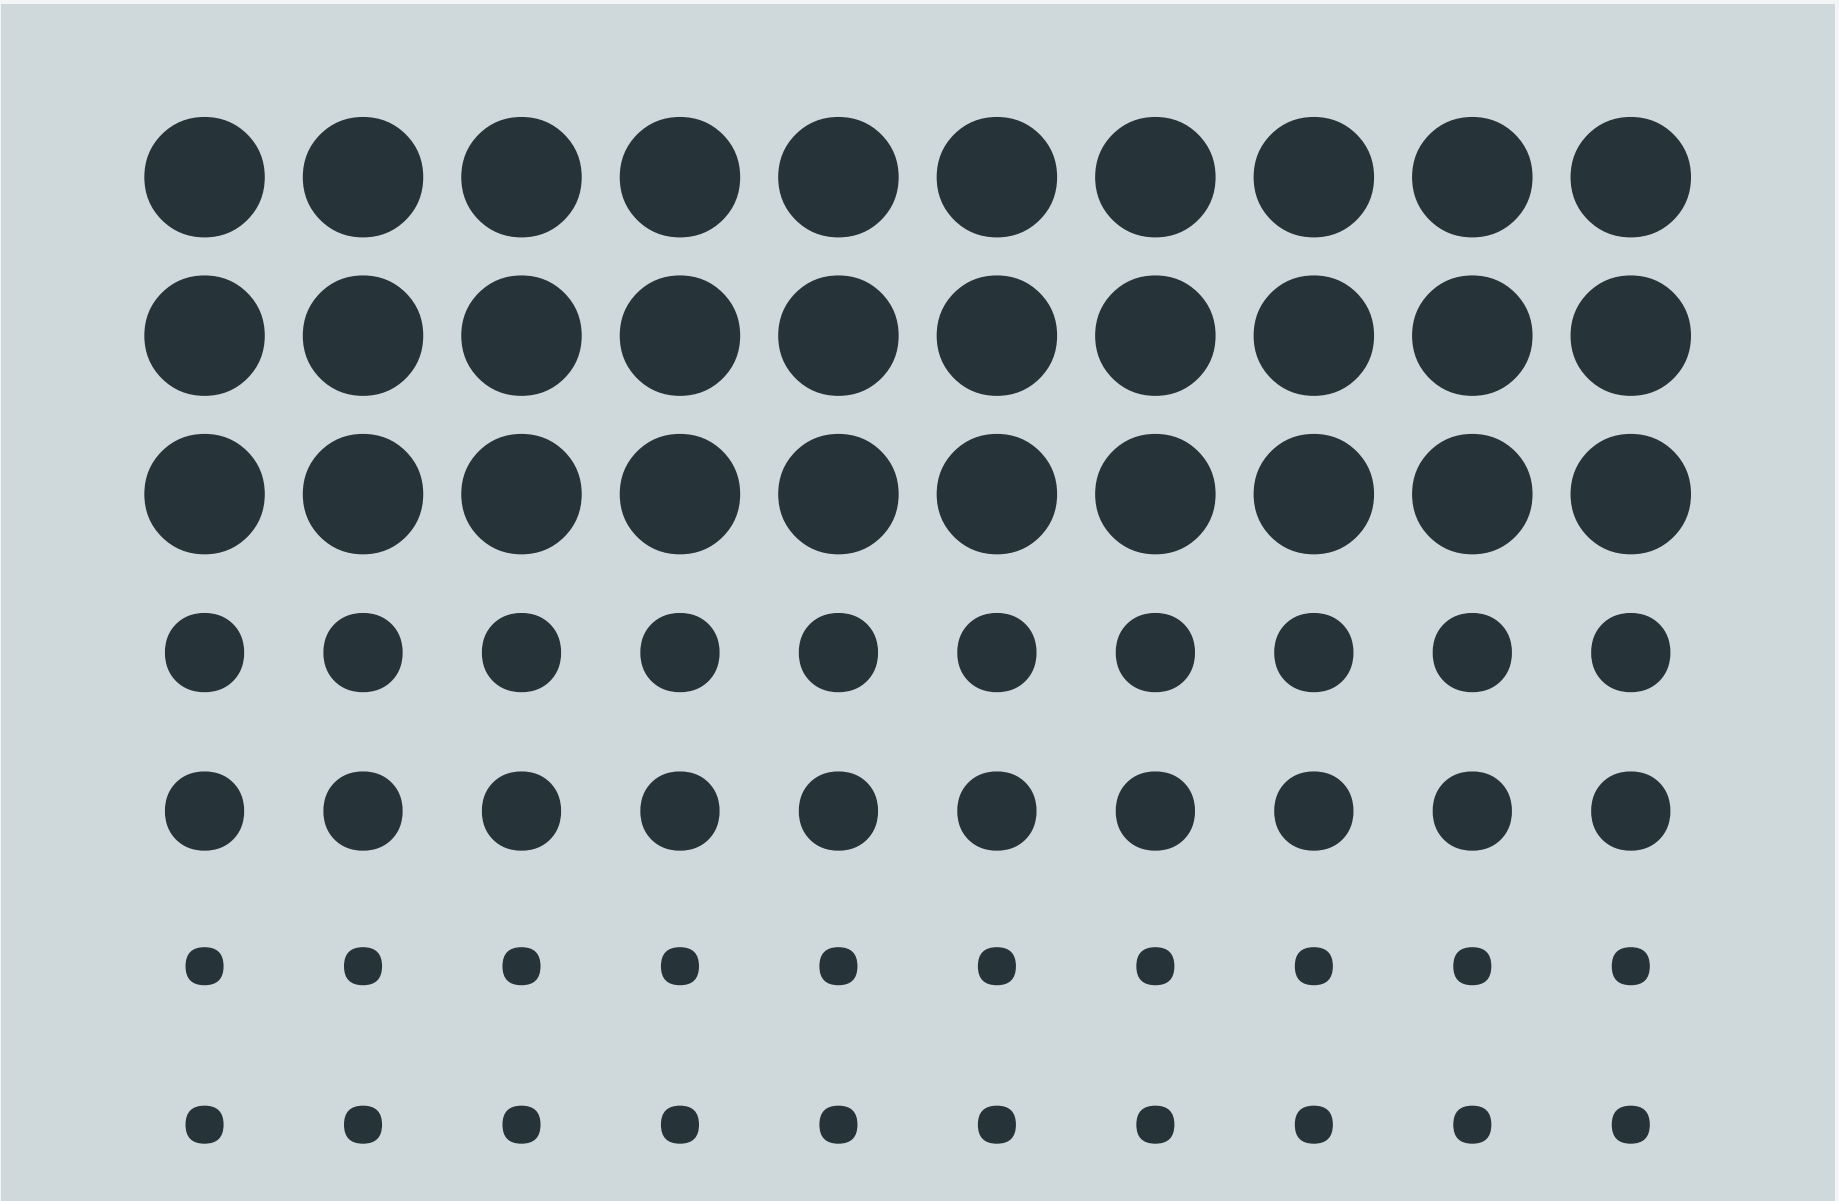

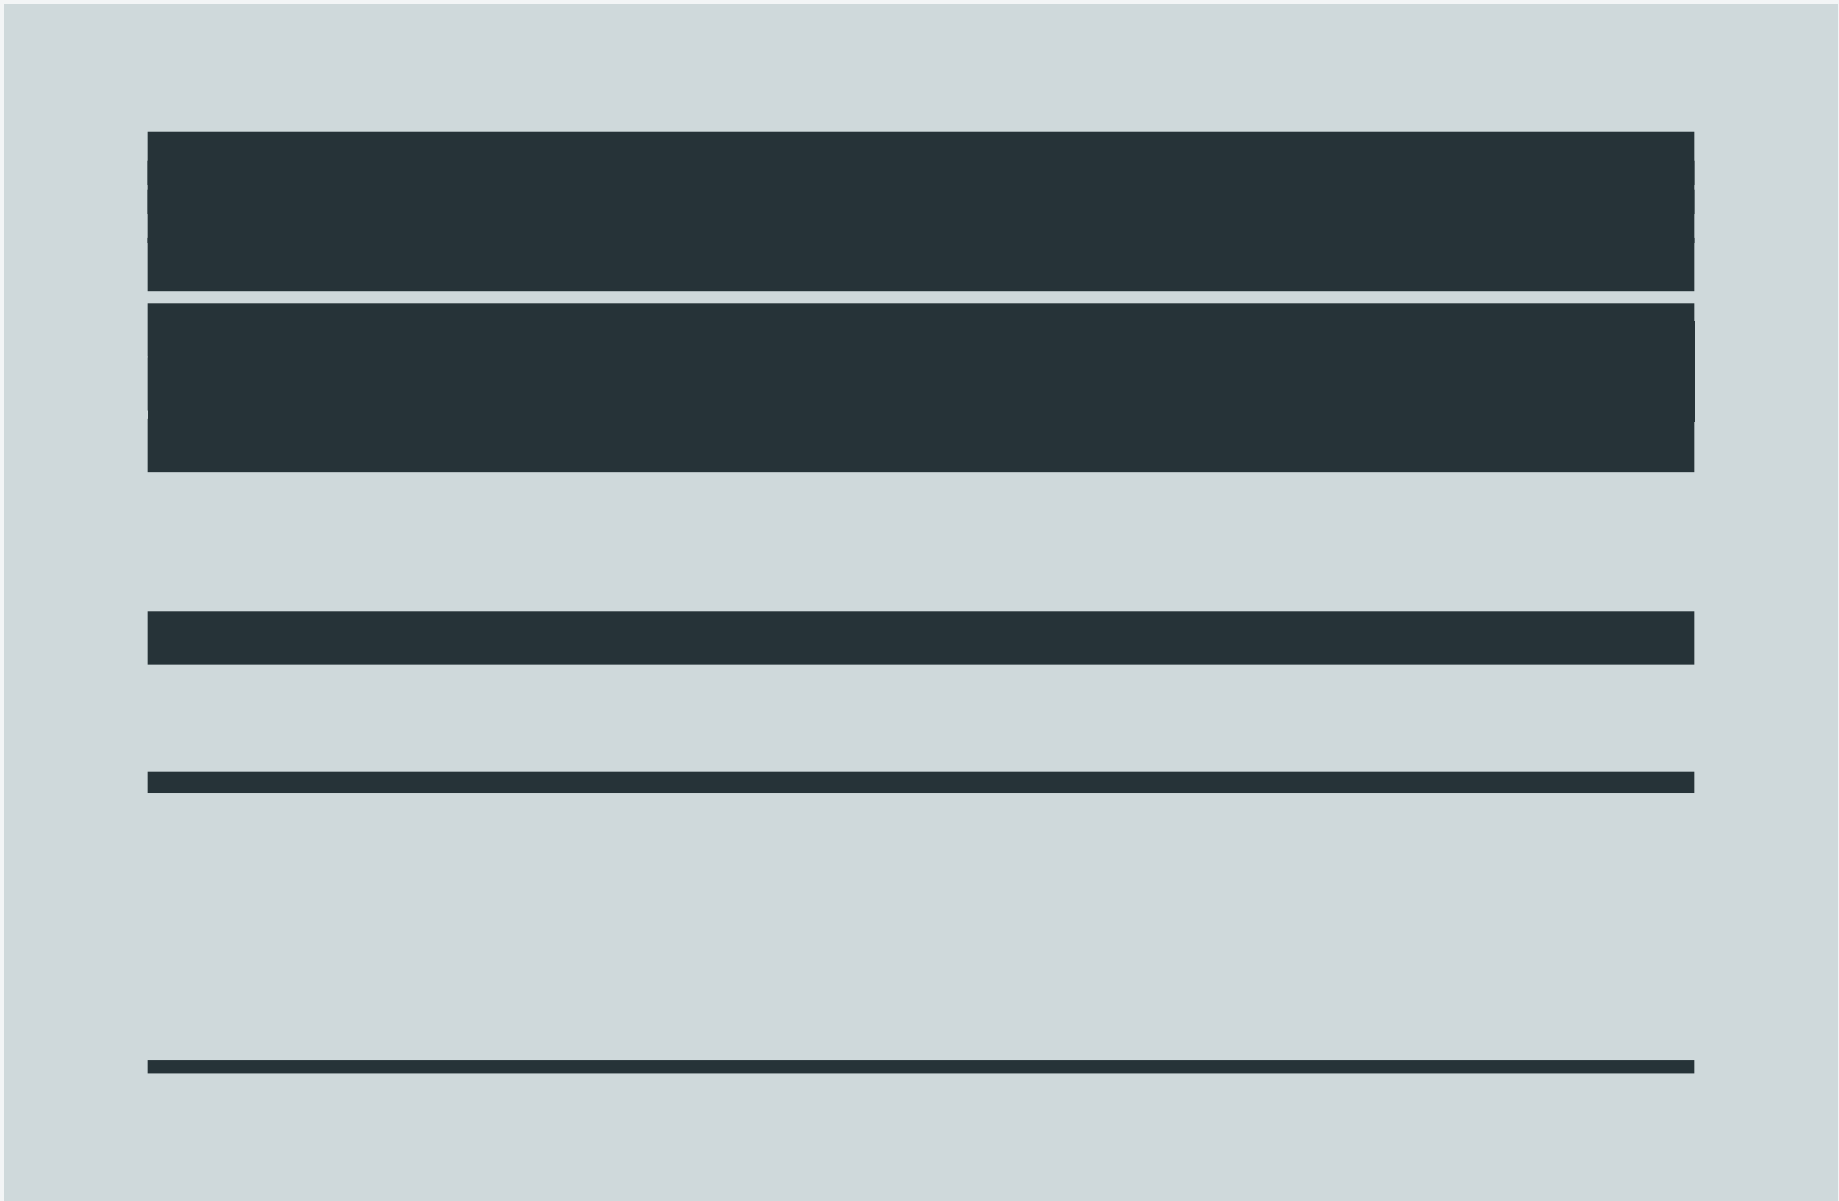

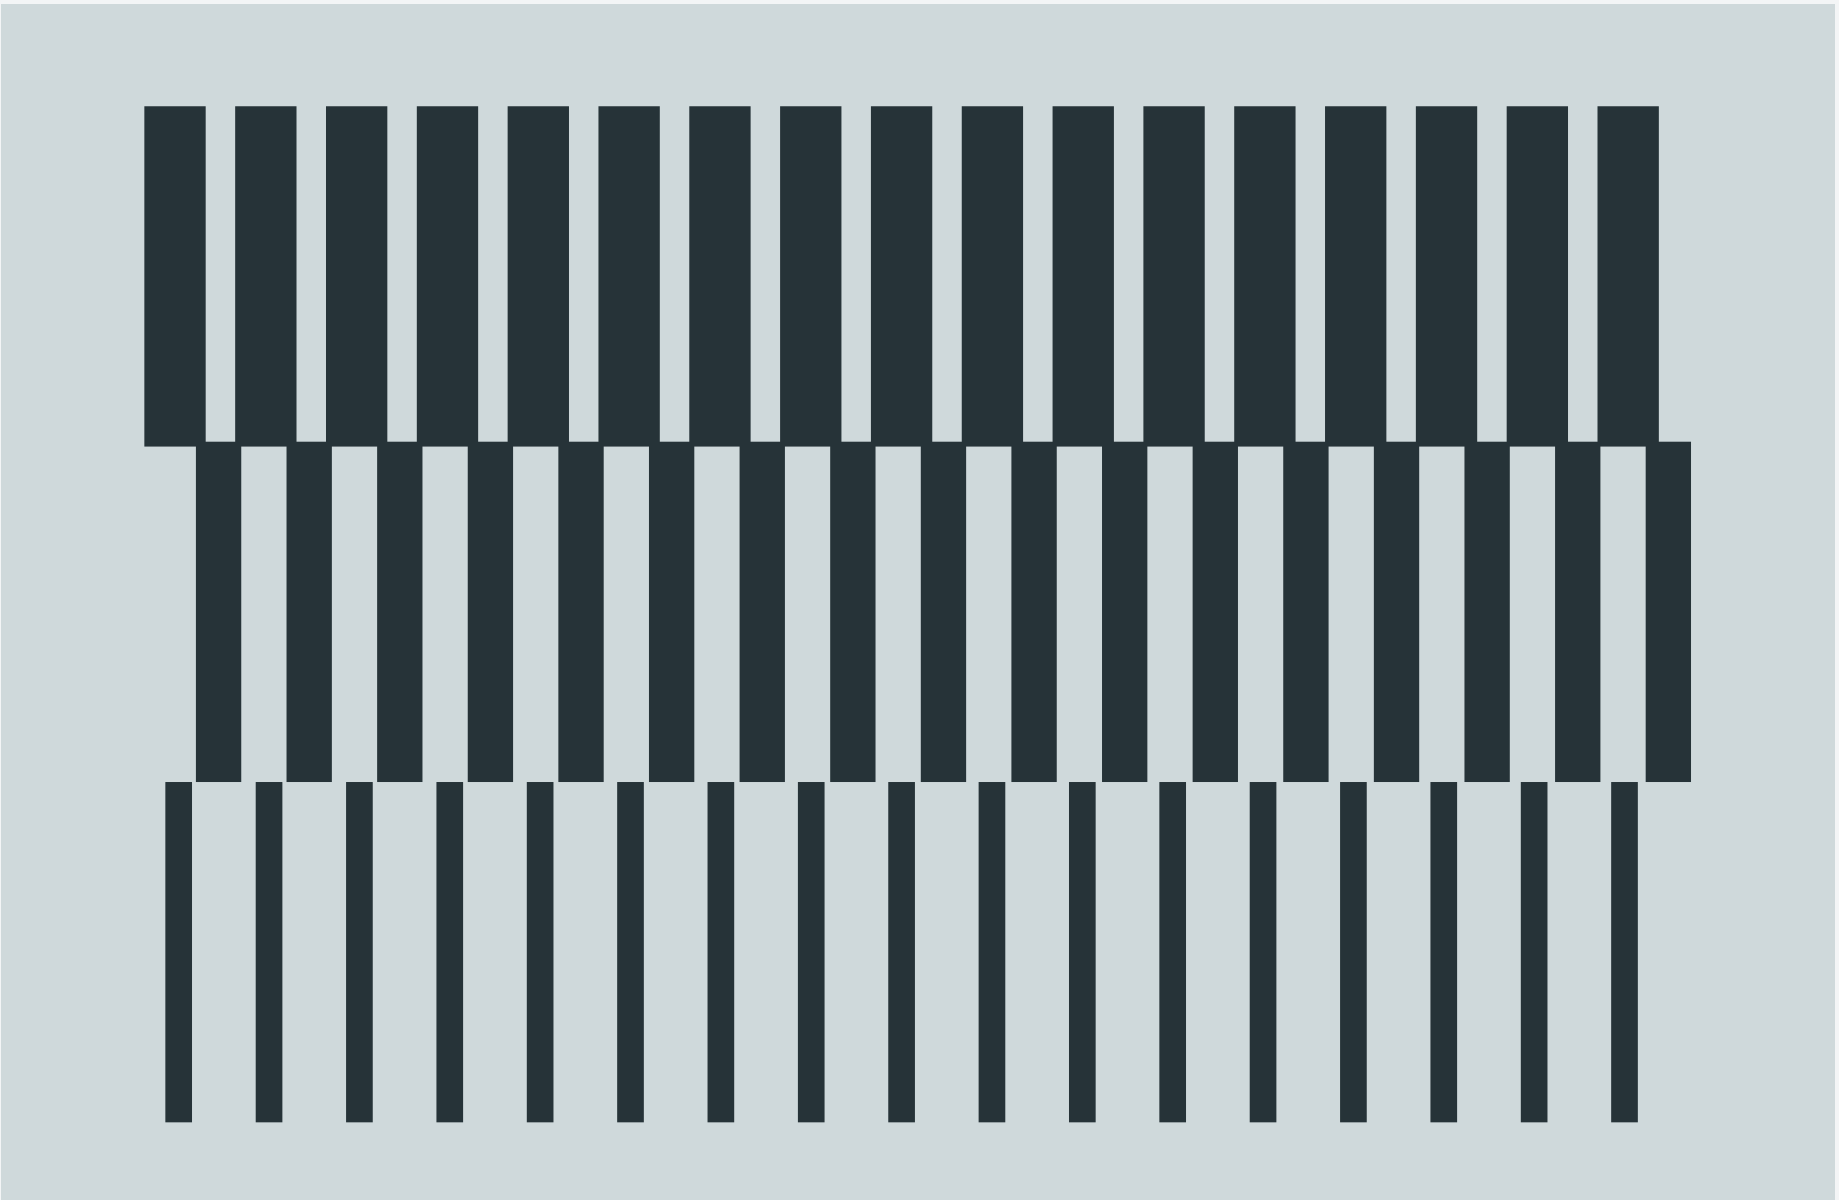

4.0 Pattern

4.1 Overview

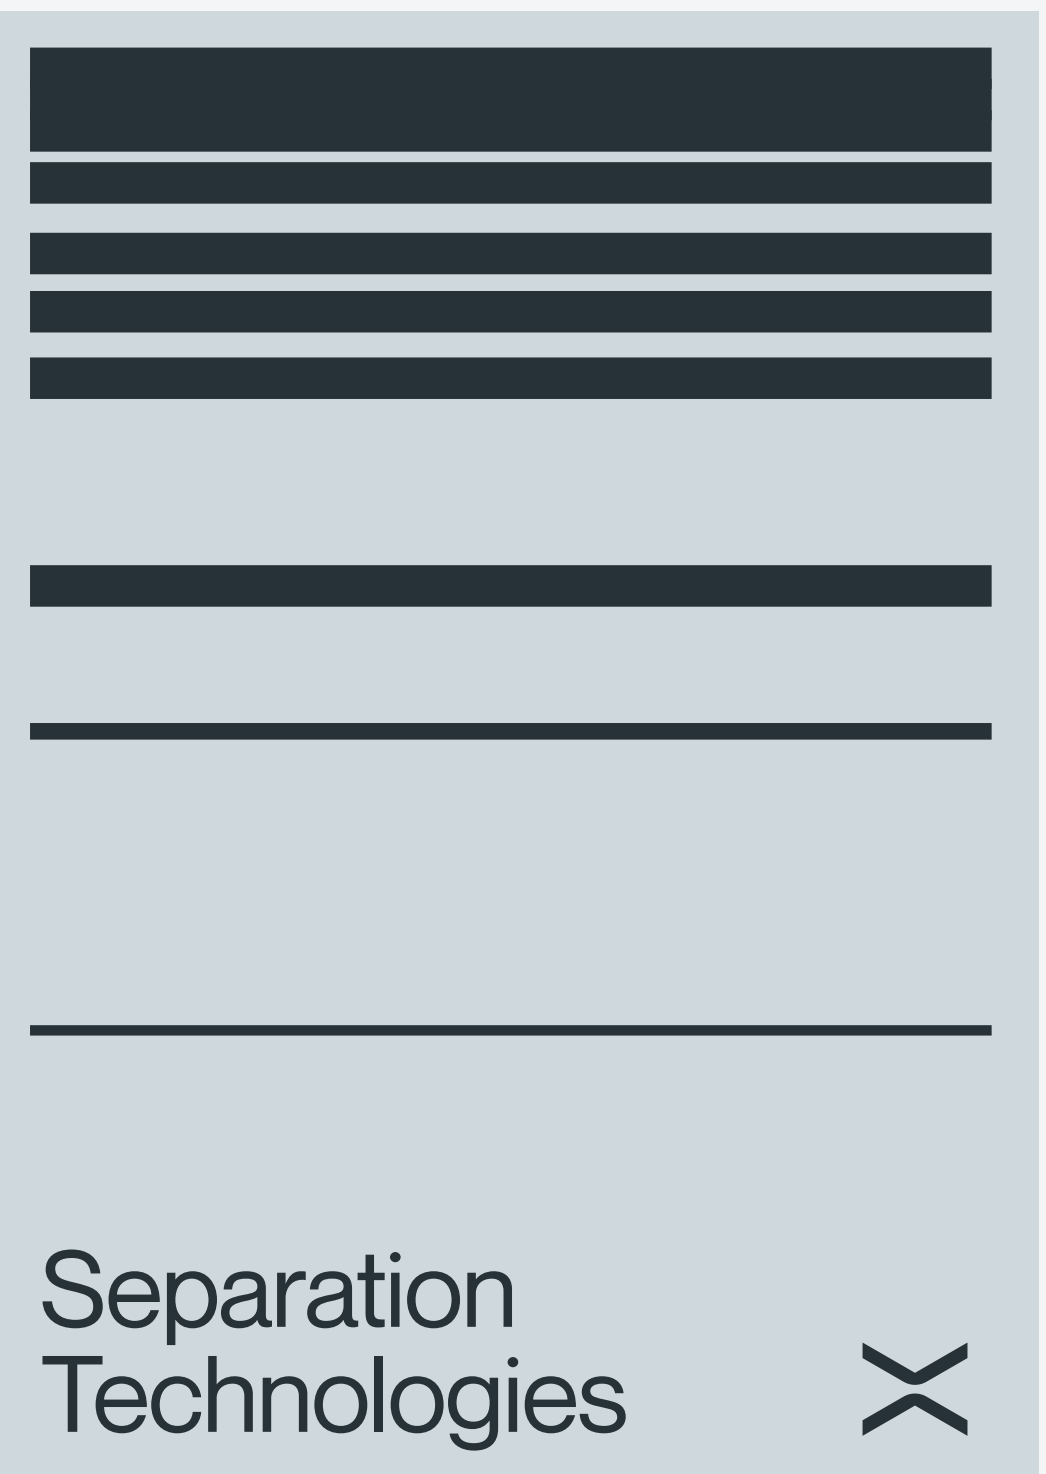

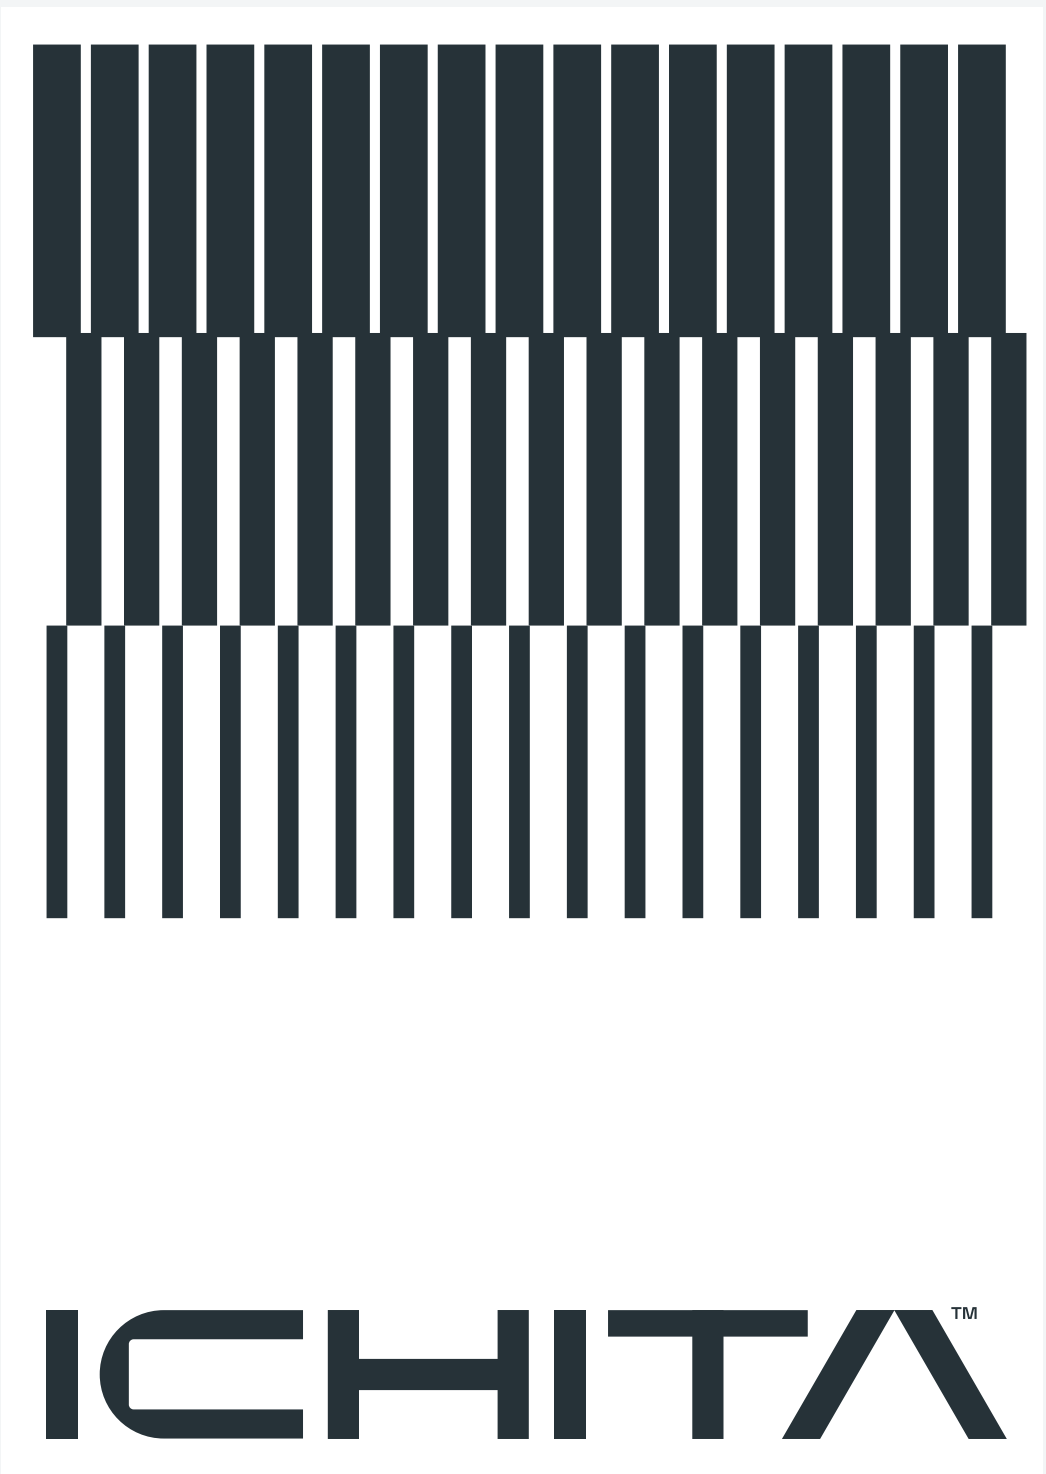

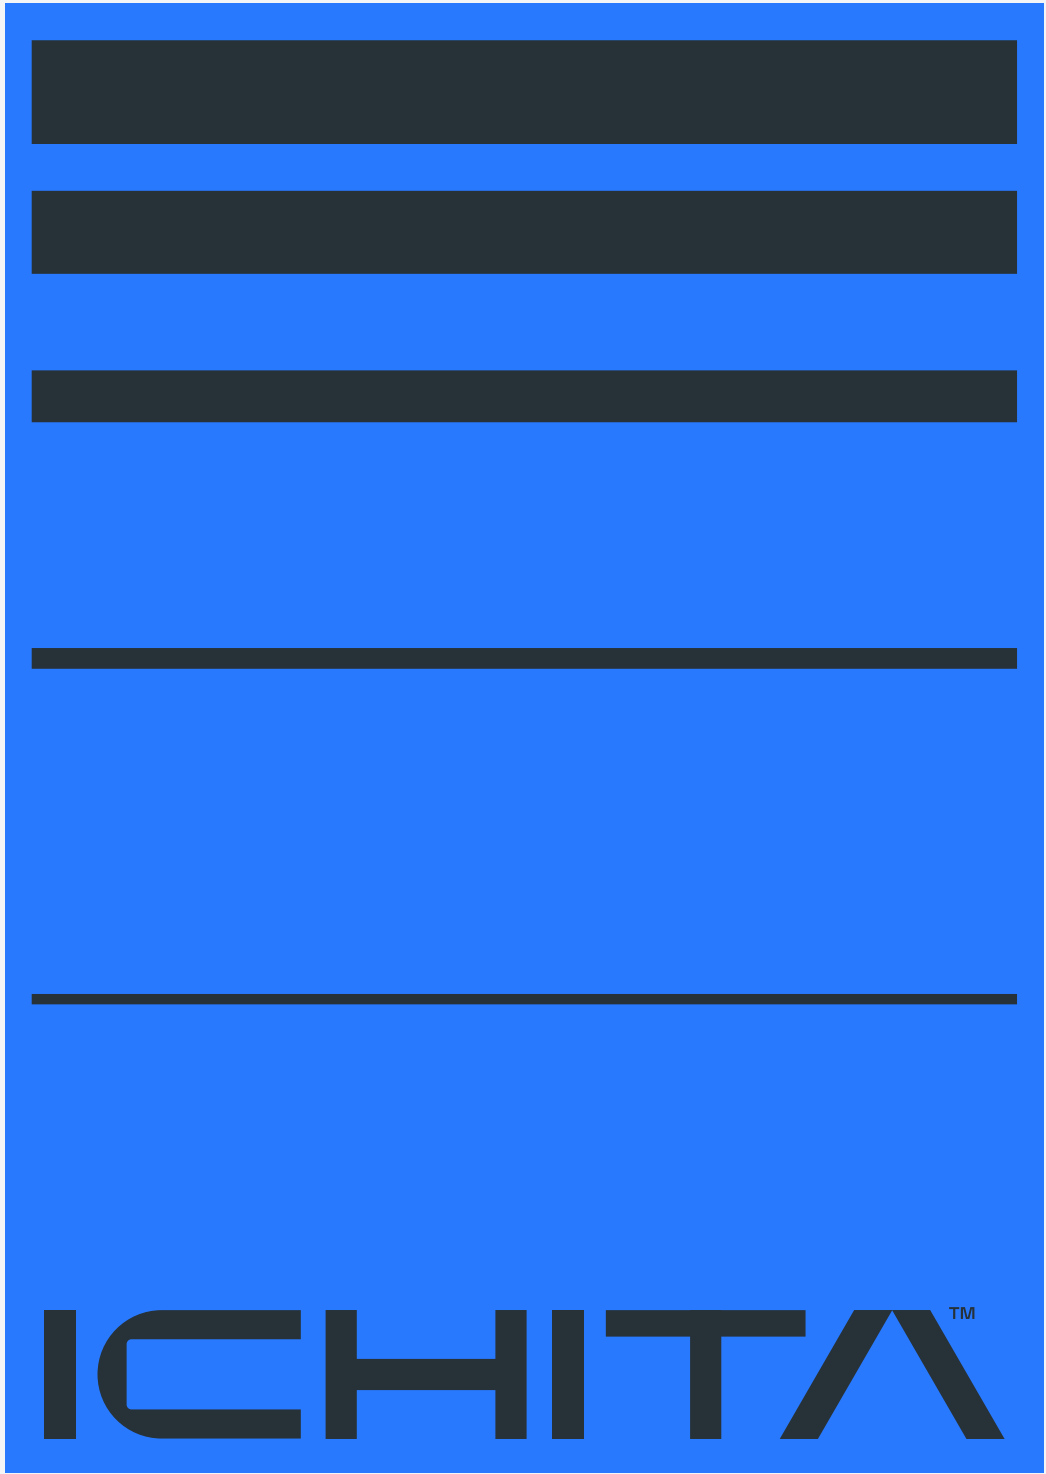

With the capacity to evolve and expand with the brand over time through motion and 3D, our pattern is built with a graphic language that can stay consistent and interesting across different applications.

The pattern graphic is based on the concept of "process" and currently works in four different ways, laying the groundwork for a wide range of visual expressions. A sense of depth and dimension is produced by these four styles. It conveys a sense of movement and dynamism and has a tangible feel to it.

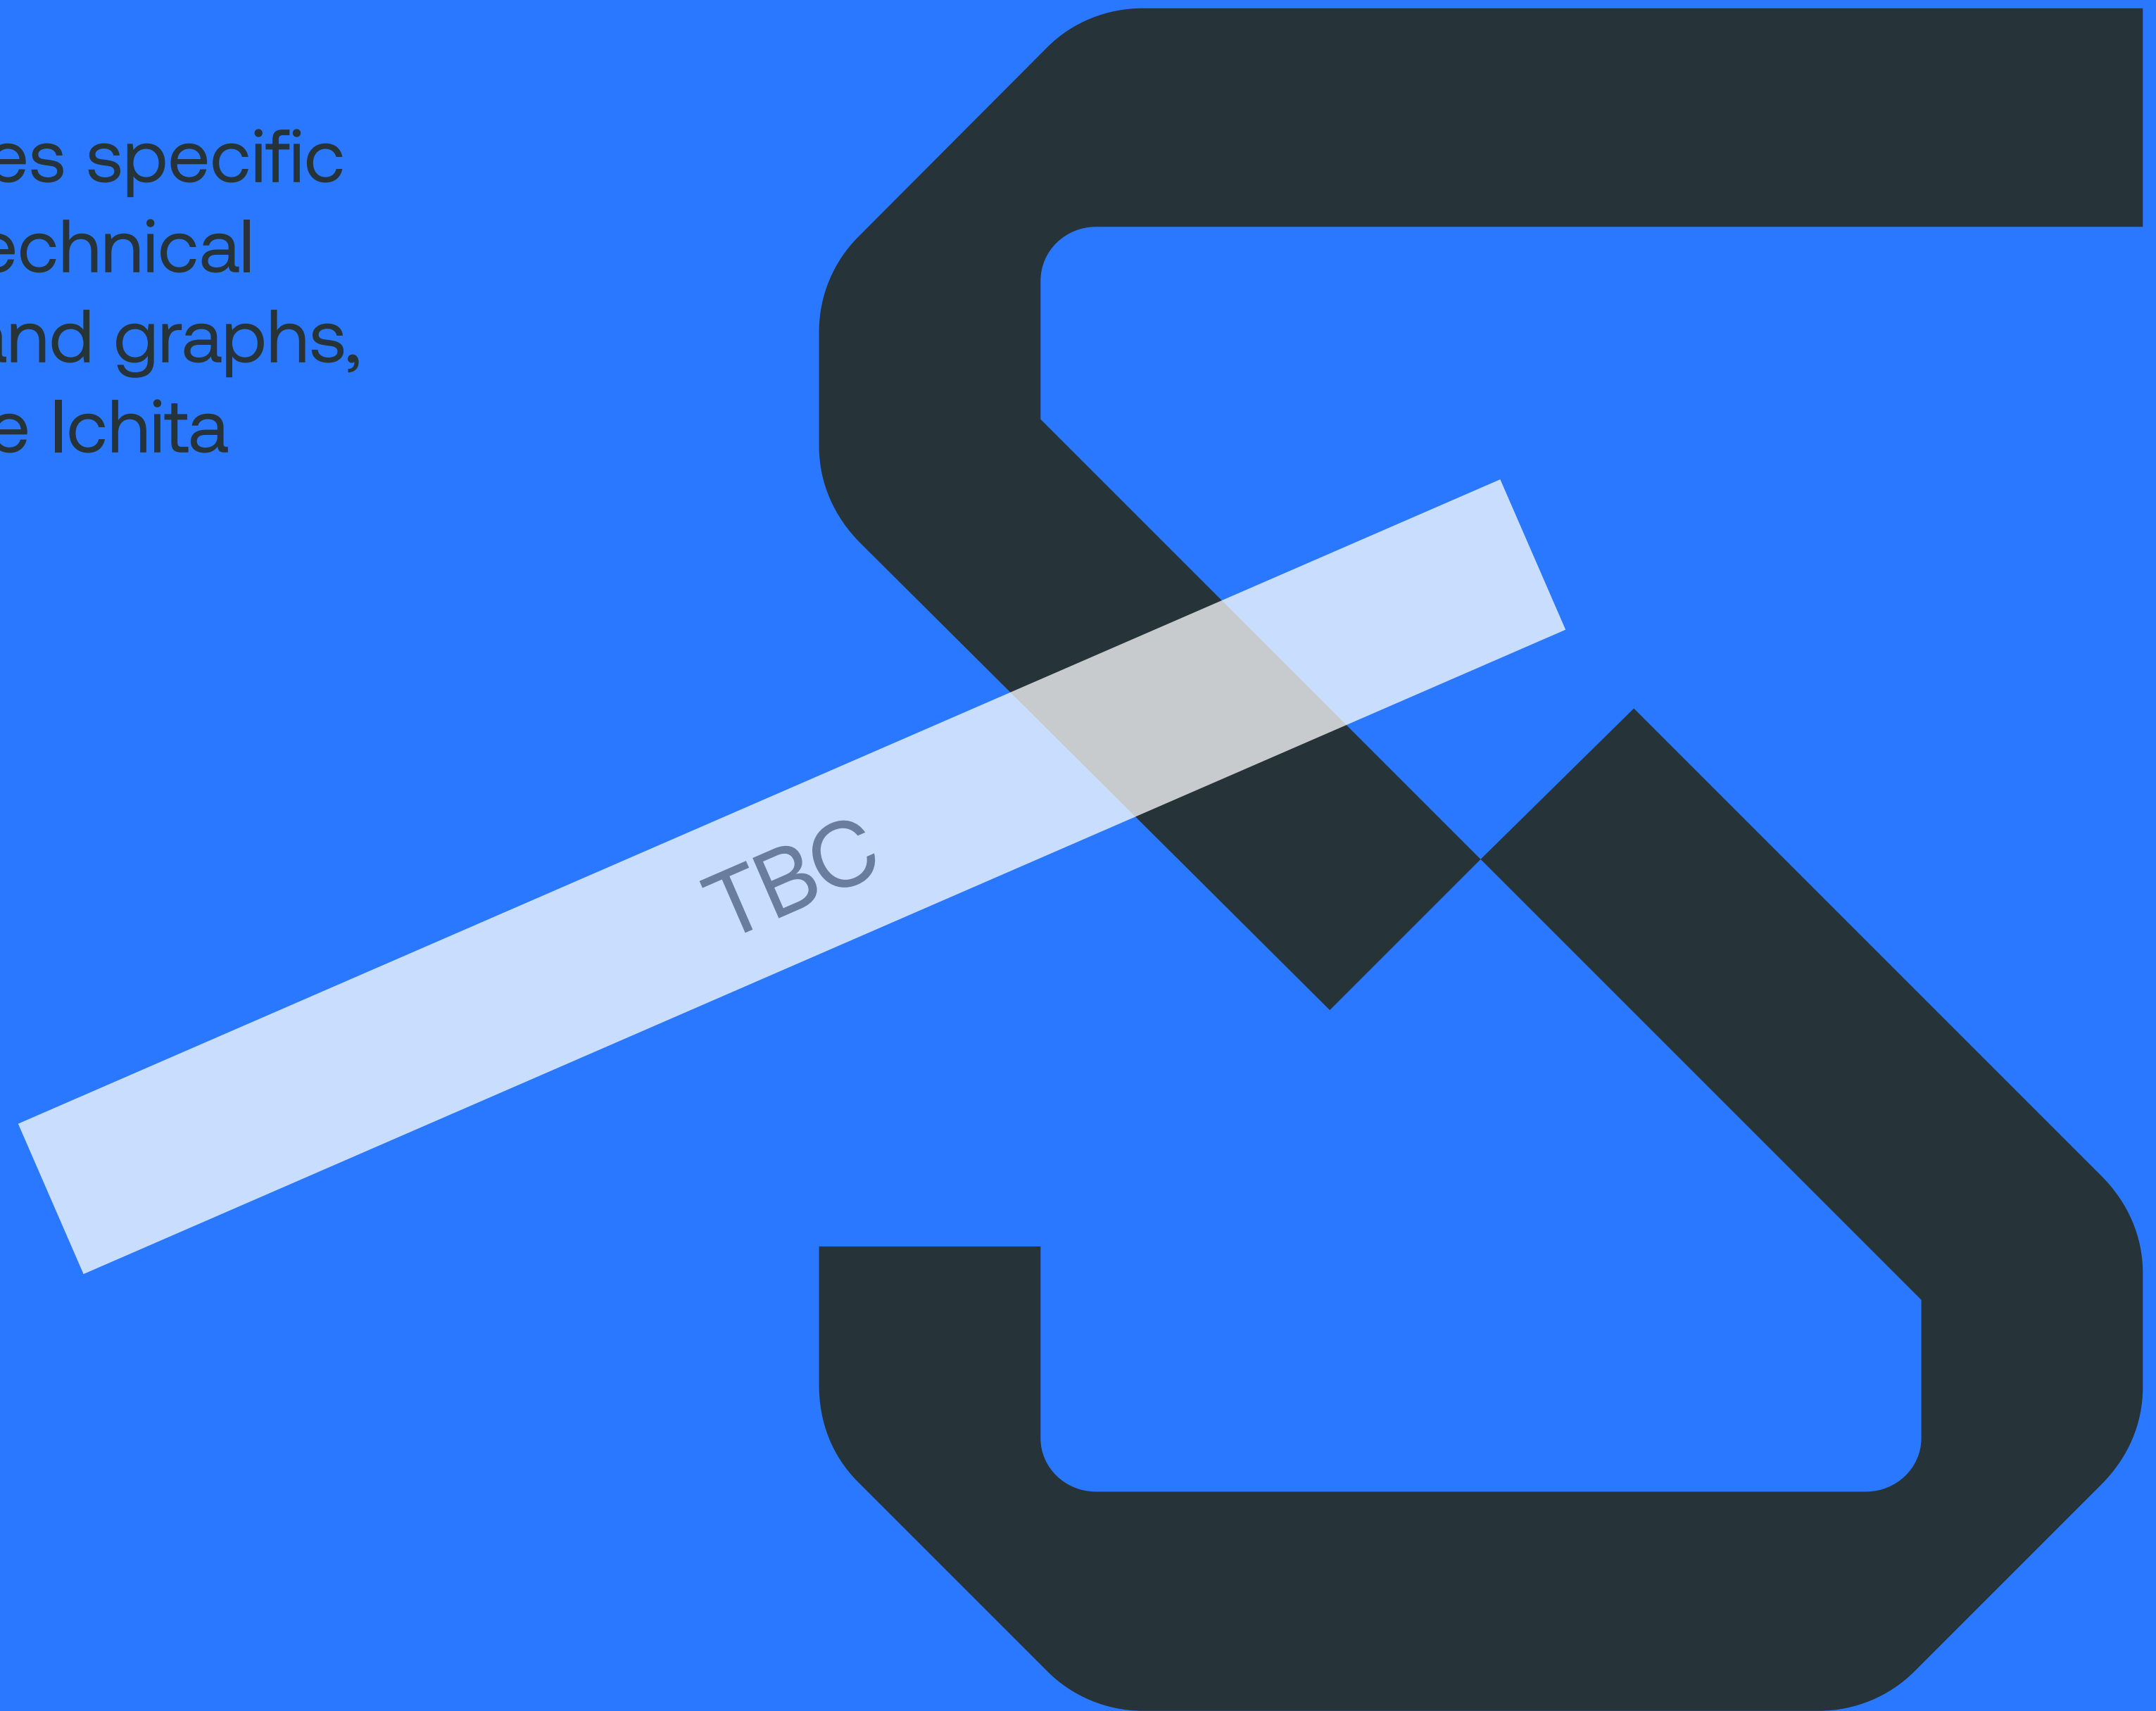

4.0 Pattern
4.1 Usage

The page outlines a few examples of how the pattern works in application.

5.0 Illustration

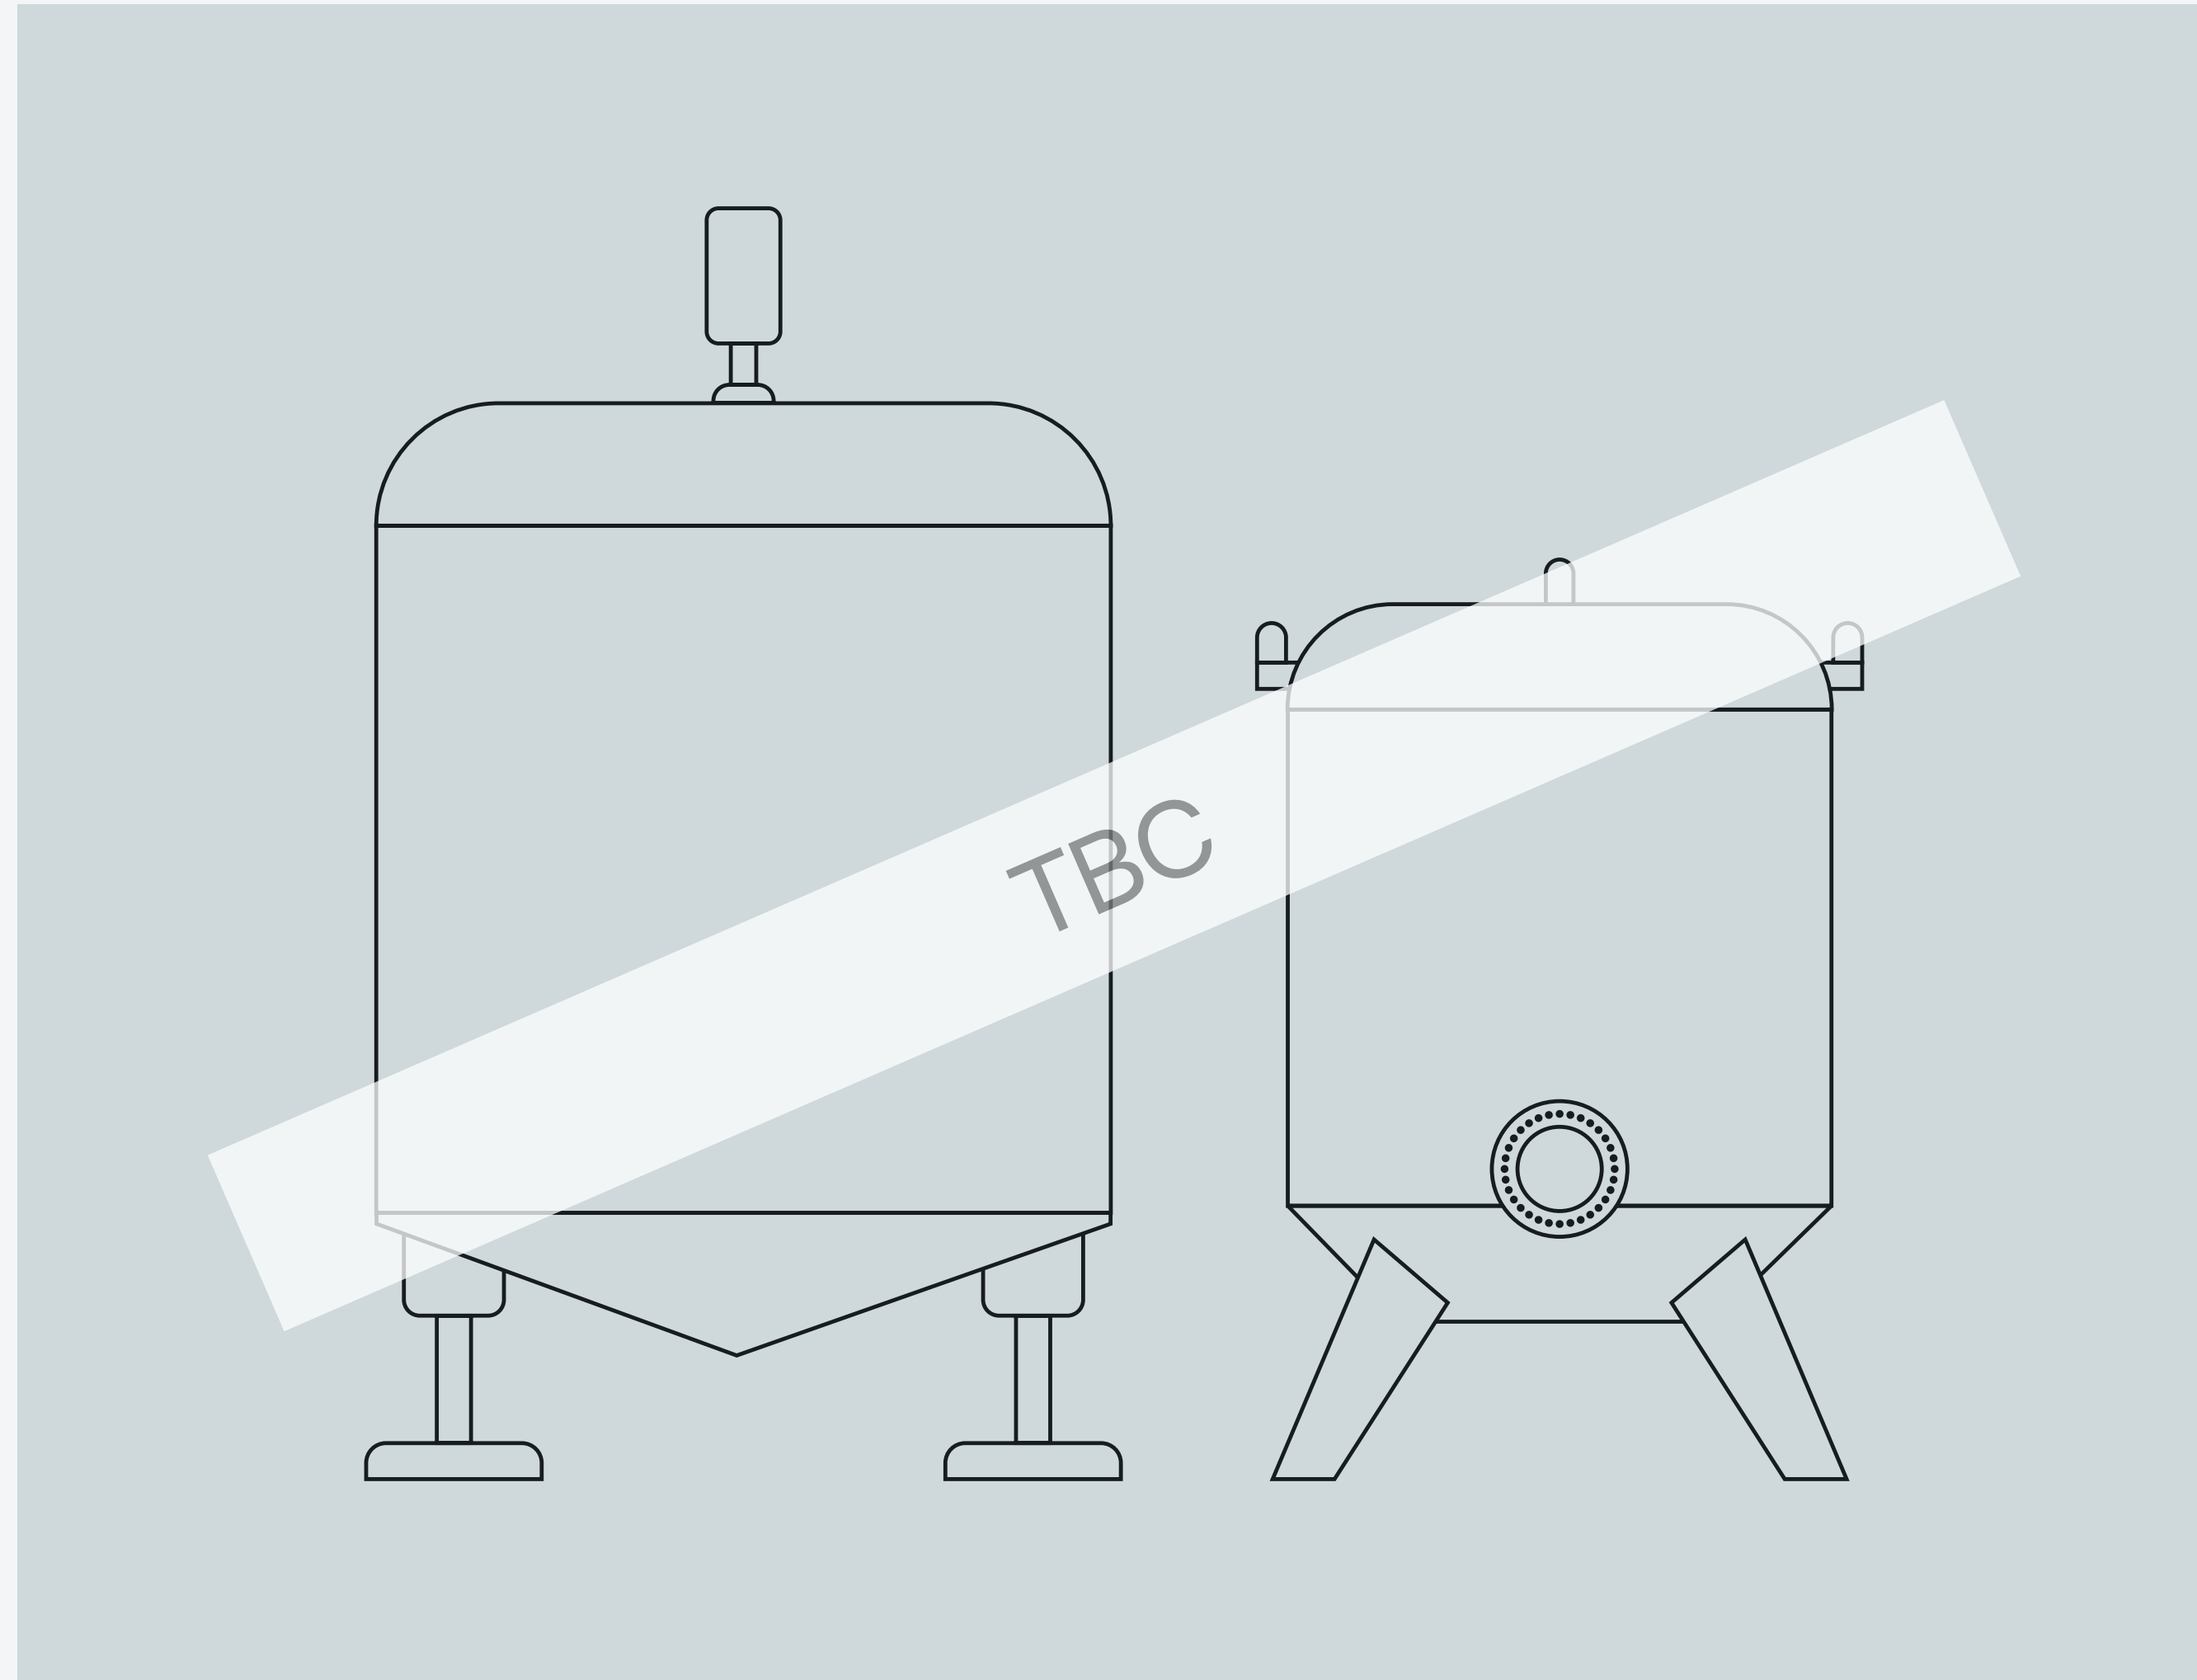

The technical illustration section provides specific guidelines and standards for creating technical illustrations, such as diagrams, charts, and graphs, that are used to represent or explain the Ichita product, process and services.

5.0 Illustration

5.1 Overview

This section is important because it ensures that all technical illustrations created are consistent in terms of style, formatting, and content, which improves the clarity and effectiveness of the illustrations. The technical illustration section typically includes information on how to create and format technical illustrations, as well as examples of best practice illustrations.

6.0 Photography

Our photography focuses around the use of two defined image types, People and Operational, with each reflecting different aspects of the Ichita offering, process and values.

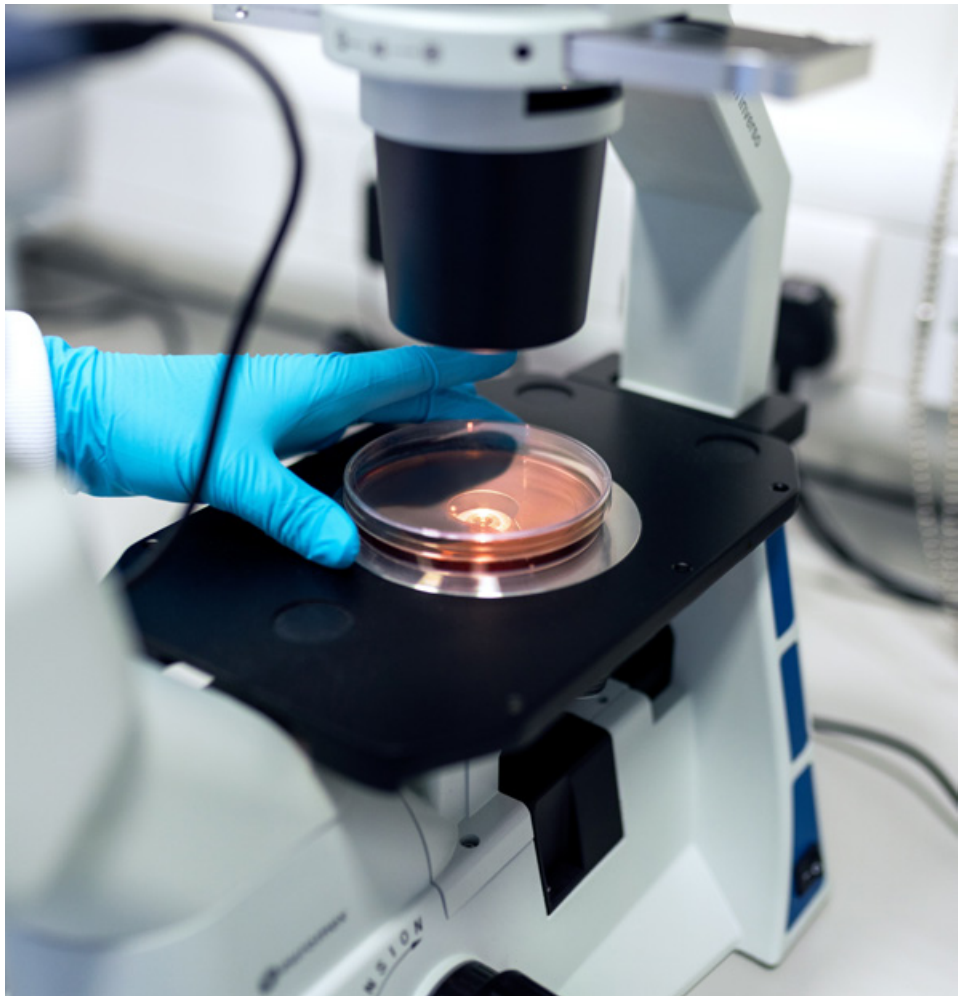

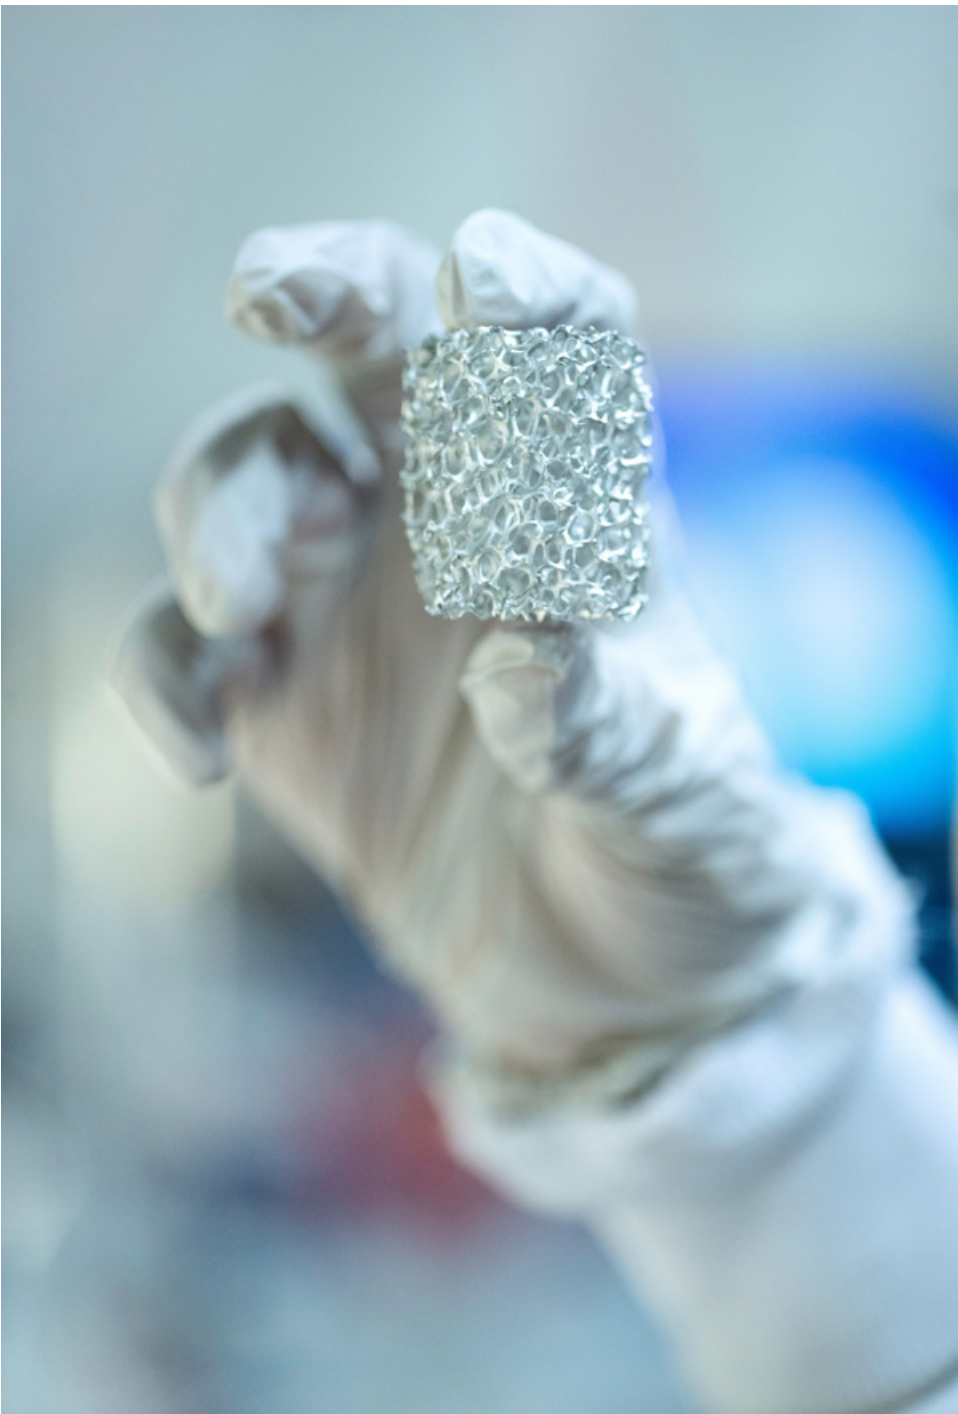

6.0 Photography
6.1 People

Our people images help position us as company that focuses our customers, our work force and the close relationship between them. We want to communicate and emphasis that we're personal, relatable, and reliable, as well as assertive and confident in our industry.

6.0 Photography
6.1 Operational

Our operational imagery helps communicates and contextualize the scale of the Ichita process. Wider shots show the factory, while more detailed close up shots visualize our attention to detail and expertise.

7.0 Identity Applied

The following pages demonstrate how our visual identity assets when applied correctly can flex across various applications creating a cohesive visual identity.
